Whereabouts London
An experiment in how open data can be used to understand and improve future cities

Whereabouts 1
Whereabouts 1 residents are a professional and well-educated population mainly residing in outer London. This group:

- 13% wake up 15% of the London population
- More likely to complain about loud traffic
- More likely to work in professional and technical occupations

We clustered London into eight Whereabouts based on similarities between people and places.
